The 2nd Circular for STENSEN III 2006

31th March 2006

Dear Colleagues and Friends,

Thank you for your willingness to join the Stensen III !

The organizing committee received about 100 mails for agreement to participate the Stensen III. Attached is a tentative list of participants and of their presentations.

We are now starting to construct the program for Stensen III. Basic Idea for program making is according to Dr Bruce Baum's suggestion. The talks will start from the topics in the Clinical applications, in order to stress the practical importance of salivary research. Thereafter the sessions will shift gradually to the Basic one. The list of topics previously announced has been altered and a new version of the program is presented in the attached file, "Tentative prog.doc".

Concerning the budget, in addition to the support from JSPS (Japanese Societies for Promotion of Sciences) the Federation of Japanese Pharmaceutical companies (75 companies) will donate. Moreover, to help overseas participants, the committee has contracted other companies in order to get further financial aid. Since, however, the Japanese fiscal year starts in April, we will receive the answers only then.

Other good news is that Okazaki City Council will support the Stensen III not financially but culturally. The Okazaki city will advertise the Stensen III on the city newspaper and invite overseas participants to the Museum where will be held a special exhibition on ancient armours and on the history of the three main generals in Tokugawa Family. There will be also an opening concert of Italian music offered by the Institute for Promotion of Italian Culture (Tokyo) and a special historical lecture: "The work of Fabricius ab Aquapendente (Harvey's Teacher) in the light of the recently restored Tabulae Pictae: its influence in the development of modern anatomy in Europe and in Japan". The lecture (free admittance of public) will be held by Prof Alessandro Riva (University of Cagliari, Italy) and simultaneously translated by Prof Konosuke Kumakura (Sophia University, Tokyo).
